26. RETIREMENT BENEFITS SCHEME

A non-contributory defined benefit scheme (the "Scheme"), properly registered under the Occupational Retirement Scheme Ordinance, has been in operation since 1995. In December 2000, most of the Scheme members have chosen to enroll in a defined contribution mandatory provident fund scheme (the "MPF Scheme") in replacement of the Scheme. The MPF Scheme is registered with the Mandatory Provident Fund Schemes Authority and authorised by the Securities and Futures Commission. The assets of the Scheme and the MPF Scheme are held separately from those of the Group under the control of the trustees. As a result, retirement benefits accruing subsequent to the establishment of the MPF Scheme are covered therefrom, as far as the Scheme members participating in the MPF Scheme are concerned. The Scheme continues to provide retirement benefits to non-participating members and those retirement benefits accrued prior to the MPF Scheme to the participating members.

The Scheme funding cost has been assessed in accordance with the advice of Buck Consultants Pty. Limited, Qualified Actuaries, using the projected unit credit method. The projected unit credit method is used to determine the ongoing contribution rate such that a satisfactory vested liability position is reached over the short term. The projections allow for salary increases over the relevant period, and projected cash flows are discounted by the assumed investment yield. It was assumed that the investment yield would exceed salary increases by 1% per annum over the long term.

At the date of the latest formal independent actuarial valuation made at 31 December 1998, the market value of the Scheme assets was HK\$192,823,250 which was sufficient to cover the vested aggregate liabilities as at that date. The next formal independent actuarial valuation will be made at 31 December 2001 in accordance with the provisions of the Occupational Retirement Schemes Ordinance.
